Mike Cooke	Broadbench

What this report contains

This analysis seeks to assess the value to the client of one policy versus another, by assessing their relative merits based upon a combination of the statistical likelihood of a successful claim and the amount that will be paid out during the term of the policy.

To assess the likelihood of a claim the system uses incidence statistics for each condition included within the selected policy to assess the likelihood of an individual being diagnosed or having treatment for a condition that meets the requirements of the claims wording. This is influenced significantly by the individual's age, gender, smoker status and whether they have opted to include children's cover. The individual's demographics together with the term of the policy will therefore influence the outcome of each comparison. The system will take account of the children's ages as well as any planned children to more specifically personalise the analysis.

The amount that a policy will pay out depends primarily on the sum assured however additional payment conditions, enhanced payments and children's cover payments vary considerably between policies and will further vary during the term of the policy if a decreasing term plan is selected. The payment levels vary with each condition and their value is assessed relative to what percentage of the sum assured they represent.

The resulting quality index is therefore a combination of the statistical likelihood of a claim and the payment level associated with each condition, that is calculated into an overall score for each policy based upon the specific situation of the client.

Note: the information provided is intended to support the research and advice of a qualified adviser and should not be relied upon without such advice. The following conditions have not been included in our assessments:

- TPD
- Loss of Independent Existence

These conditions cannot be sensibly assessed for their relative merits since in some cases it will vary dependent upon the individuals occupation and/or will be required to meet ADL-based claims wording which result in around 70% declinatures. Also, this cover is optional with many insurers therefore we feel that any ranking would be misleading.

When assessing the best policy for a client there are many factors to be taken into account alongside this research including the price of the policy and any additional options the insurers provide. This analysis focuses on the condition coverage within policies to assist in the assessment of their relative merits.

Contents

This PDF is interactive. So you can click on the links below to jump to the section you need.

[INTRODUCTION >](#)

Contains information regarding the creator of this report, when it was made and a brief explanation of what it contains and where the information comes from.

[CLIENT DETAILS >](#)

Lists the details entered about the client in question in order to create this report within the CIExpert application.

[COMPARISONS INCLUDED >](#)

This section provides a summary of what policy comparisons are included in this report, which policies have been selected for each of these and how these policies are compared based on their scoring and preferential conditions.

[POLICY RANKINGS >](#)

Shows the relative ranking of the current policies compared based upon the clients individual requirements compared with pricing information that can be provided by the adviser.

[THE COMPARISONS >](#)

Each head to head policy comparison created shows the overall quality index together with a breakdown to see the balance of Full Payments, Additional Payments and Children's Payments that are influencing the overall ranking between the two policies.

To assist in comparing the two policies selected, any condition that has a preferential definition due to either the claims wording or payment level are identified with a 'thumbs-up' icon. These are also ranked so that those with the most impact (i.e. gold ranking) can be readily identified.

[Score breakdown](#)

A full breakdown of how the score is formulated is provided, showing what features of the policy have the strongest effect. For example the contribution of children's vs adult conditions can be understood.

[Preferential Conditions List](#)

The preferential conditions for each policy are listed side by side and ordered by degree of importance in their impact on the comparison i.e. gold, silver or bronze (important, moderate or minor).

[Preferential Conditions Info](#)

For preferential conditions that have an important (gold) or moderate (silver) impact on the comparison, the condition descriptions and incidence rates are provided to assist with understanding their relevance to the client.

[Policy Wording](#)

The policy wording itself for all the conditions covered by each policy is shown for full comparison of the cover provided.

[CONDITION MATCHING >](#)

Insurers often use different condition names in their plans and supporting literature. CIExpert endeavours to standardise these and use those that are most consistent across the industry. To assist in identifying where these are included within the CIExpert analysis, we have created this appendix.

CONDITION MATCHING

Client Details

Full Name	Gender
Peter Hillerby	Male
Age	Date of Birth
51	8 February 1975

Scenarios

Below are the different "scenarios" that have been created. These are essentially different variations of the children's cover and sum assured sections, as well as smoker status of the client details that have been used for the comparisons generated.

Scenario 1

Smoker	No	Sum Assured	£100,000
		Term	19
		Type of Cover	Level

Comparisons Included

This section provides a summary of what policy comparisons are included in this report, which policies have been selected for each of these and how these policies compare based on their scoring and preferential conditions.

Comparison 1

Current

Scenario 1 Male non-smoker age 51, **no Children's Cover**, £100,000 level cover for 19 years.

Policy A

Standard - Adult Only Policy
3 December 2023 to present

Score: 19,596

Preferential Conditions: 50

Policy B

SIC 3X - Adult Only Policy
27 February 2023 to present

Score: 19,744

Preferential Conditions: 54

[Policy Rankings >](#)

[Score Breakdown >](#)

Policy Rankings

The following shows the relative ranking of the policies compared based upon the clients individual requirements compared with pricing information that can be provided by the adviser.

Scenario 1 Male non-smoker age 51, **no Children's Cover**, £100,000 level cover for 19 years

Provider	Policy Option	Score	Monthly Cost	Comparison
 Vitality	SIC 3X - Adult Only	19,744		C1 >
 ROYAL LONDON	Standard - Adult Only	19,596		C1 >
 Legal & General	+ Adult Extra	19,229		
 LVE	Enhanced + Standard Child	18,799		
 ZURICH	Business Only - Select - Adult Only	18,630		
 AVIVA	Business Only	17,620		
 Beagle Street	Standard - DTC	Unavailable because this Plan cannot be used for the requested Cover Purpose		
 GUARDIAN <small>LIFE. MADE BETTER.</small>	Standard - Adult Only	Unavailable because this Plan cannot be used for the requested Cover Purpose		
 SCOTTISH WIDOWS	Protect	Unavailable because a Policy Holder is too old at end of term		

The Comparisons

Each head to head policy comparison created is fully outlined, including the full score breakdown and the policy wording for each condition that is included by each policy is displayed comparatively for in depth analysis.

Glossary

Included Condition

Indicates that this condition is included by the policy specified.

Preferential Condition (Gold, Silver, Bronze)

Indicates that in this assessment, the condition in question is preferential to the client as it either has superior wording with a higher statistical likelihood of paying out and/or a superior level of payment. These are ranked gold, silver and bronze per assessment, as follows:

These conditions have an **important** impact on the overall statistical ranking of these two policies.

These conditions have a **moderate** impact on the overall statistical ranking of these two policies.

These conditions have a **minor** impact on the overall statistical ranking of these two policies.

Enhanced Payment

Indicates that this condition has an enhanced payment on this policy.

Additional Payment

Indicates that this condition has an additional payment, where a claim does not reduce the sum assured.

Severity Payment

Indicates that this condition is a severity based payment, where a claim does not reduce the sum assured.

Multiple Severity Payments

Indicates that this a condition where CIEExpert has grouped multiple severity payment conditions within it, to provide clarity when comparing.

Partial Severity Payment

This is the same as a severity payment condition with the exception that a claim does reduce the residual sum assured.

Multiple Partial Severity Payments

This is the same as a multiple severity payment condition with the exception that a claim does reduce the residual sum assured.

Gender specific condition

Indicates that these conditions are gender specific and therefore the scoring is only applied when it aligns with the gender of the client.

Historic

Historic / Replacement, or Current Comparison

Current

Indicates what type of comparison it is. A historic comparison is where a client's existing policy is compared to a current policy. A current one compares two policies that are both available on the market at the time this report was created.

Comparison 1 Score Breakdown

Current

Scenario 1 1 adult non-smoker, no Children's Cover, £100,000 level cover for 19 years.

Reinstatement of Serious Illness Cover - after (Severity Level A claim) 100% of the sum assured

Serious Illness Cover 3X allows the policyholder(s) to claim up to three times their total cover amount across the lifetime of their plan* – For example, if the total cover amount is £100,000, the policyholder(s) will be able to claim a total of £300,000. This ensures all eligible people covered by the plan are protected for as long as possible, where other insurer's plans will end once a full 100% claim is made.

** The most you can receive in one claim is 100% of your total cover amount at the time of claim.*

Dementia and FrailCare Cover (DFCC)

When your clients take out a Serious Illness Cover plan with Vitality, they will automatically get the Dementia and FrailCare Cover (DFCC) option included if TPD is included in the plan. When their Serious Illness Cover comes to an end, the option allows any remaining cover to automatically be converted into a new DFCC plan and all they will need to do is keep paying the premiums applicable at that time.

The Dementia & FrailCare Cover (DFCC) plan is designed to provide cover for later life conditions such as Alzheimer's, Dementia and Parkinson's based upon meeting the defined severity levels.

Full details can be found in the Vitality Plan Conditions document.
